

Vishal Bedke

MERN Stack Developer | Full Stack Development | API Integration | Responsive Web Applications

bedkevishal@gmail.com • +91 7030391086 • Androbim Solution Pvt. Ltd. • <https://pixelperfectdev.netlify.app/>

ABOUT

Full Stack Developer (MERN Stack) with 3.6+ years of experience in developing scalable, responsive, and high-performance web applications. Skilled in React.js, Next.js, Node.js, Express.js, and MongoDB with hands-on experience in REST API development, frontend optimization, and backend architecture. Passionate about building user-friendly applications, writing clean and efficient code, and collaborating with teams to deliver reliable software solutions. Experienced in modern JavaScript development, debugging, performance optimization, and Agile development practices.

TECHNICAL SKILLS

Frontend Technologies	React.js, Next.js, JavaScript, HTML5, CSS3, Bootstrap, Tailwind, Redux
Backend Technologies	Node.js, Express.js, RESTful APIs
Programming Languages	JavaScript, TypeScript, Python
Cloud & Deployment	Vercel, Netlify, Firebase
Development Practices	Agile Methodology, Responsive Design, API Integration, Performance Optimization
Databases	MongoDB, MySQL
Tools & Platforms	VS Code, Postman, npm, GitHub
OS	Windows, MacOS

CORE COMPETENCIES

API Integration & Development	Full Stack Development & Application Management
- RESTful API development and third-party API integration - Backend service development using Node.js and Express.js - API request/response handling and database integration - Authentication, authorization, and secure API implementation - Frontend-backend integration using React.js and Redux - Debugging, performance optimization, and error handling - Git-based version control and collaborative development	- Development of scalable MERN stack web applications - Responsive UI development with React.js, Next.js and modern JavaScript - MongoDB database design, CRUD operations, and optimization - State management using Redux and React Hooks - Cross-functional collaboration with UI/UX and backend teams - Agile development, code reviews, and deployment support - Application maintenance, feature enhancement, and bug fixing

PROFESSIONAL EXPERIENCE

Software Engineer/ Software Developer

Androbim Solution Pvt. Ltd.

Oct 2022 – Apr 2026

API Integration & focused on creating responsive and high-performance applications

- Developed and maintained scalable full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Designed and integrated RESTful APIs for seamless frontend and backend communication.
- Built responsive and user-friendly interfaces using React.js, Next.js, JavaScript, HTML5, and CSS3.
- Optimized application performance using React Hooks, memoization, lazy loading, and reusable components.
- Implemented secure authentication and authorization mechanisms for web applications.
- Managed MongoDB databases, including schema design, CRUD operations, and query optimization.
- Collaborated with UI/UX designers and cross-functional teams to deliver high-quality user experiences.
- Participated in code reviews, debugging, testing, and performance optimization activities.
- Worked in Agile development environments with sprint planning and task management.
- Used GitHub for version control, code collaboration, and deployment workflows.
- Mentored junior developers and supported knowledge sharing within the team.
- Maintained application scalability, reliability, and security across multiple projects.

PROJECTS

Vlog Call Admin Panel

Admin panel platform connecting fans with celebrities through video and voice calls.

- Developed scalable admin functionalities using React.js, Node.js, and MongoDB.
- Managed user accounts, celebrity onboarding, and call scheduling workflows.
- Integrated secure payment APIs and real-time analytics dashboards.
- Optimized MongoDB queries and API performance for high-traffic usage.
- Implemented role-based authentication and admin access control.

Heaven Celebrations Admin

Event and theater booking management system for customized celebration spaces.

- Built booking management modules with MongoDB database integration.
- Developed APIs for event scheduling, setup customization, and amenity handling.
- Created responsive admin dashboards for managing bookings and customer requests.
- Improved backend performance and optimized CRUD operations.

Kinz Construction Material Management System

Construction material management admin panel for inventory and operations tracking.

- Designed MongoDB schemas for material, vendor, and stock management.
- Built RESTful APIs for inventory tracking and order management.
- Implemented reporting and analytics modules for operational monitoring.
- Improved application scalability and database query efficiency.

HopnHost Admin Panel

Admin panel for hospitality and property management operations.

- Developed responsive admin interfaces using React.js and Tailwind CSS.
- Integrated APIs for booking management and customer handling.
- Managed MongoDB collections and optimized backend workflows.
- Implemented secure authentication and role management features.

SastaStay Admin Panel

Property and accommodation management platform admin dashboard.

- Built scalable MERN stack modules for listing and booking management.
- Integrated REST APIs and handled backend data management using MongoDB.
- Worked on performance optimization and responsive UI development.
- Collaborated in Agile development and deployment workflows.

EDUCATION

BBA (Bachelor of Business Administration) –*May 2022*
